Experimental preview.

Lyric language Latin

Alignment follows the lyric language. Manual segments take precedence. Lyrics provide minimum spacing between neumes. Oversized syllables can be viewed by scrolling the score.

Select	Punctum	Virga	Punctum inclinatum
Quilisma	Podatus	Clivis	Scandicus
Torculus	Climacus	Porrectus	C clef
F clef			

Quilisma figure Podatus

Initial clef

Clef type C (do) Staff line (bottom to top) 3

Initial clef changes preserve the melody in the initial passage. In Select mode, focus the first clef and use ↑/↓ to change its line. Later systems repeat the effective clef at their semantic start.

Divisions

Placement kind Minima Place division

Tab moves keyboard focus without changing selection. The blue marker shows where engraved-lyric keys act; the purple cue marks selection. Delete/Backspace deletes the focused engraved syllable. Selection buttons act on the selected syllable.

Lyrics: - continues a word · Space starts a word · _ skips a neume. Enter saves; Escape cancels and exits. Tab moves focus. Changing text resets manual alignment to automatic; undo restores it.

Select music and activate Lyrics, or select an existing syllable to edit.
